Installation of Java:

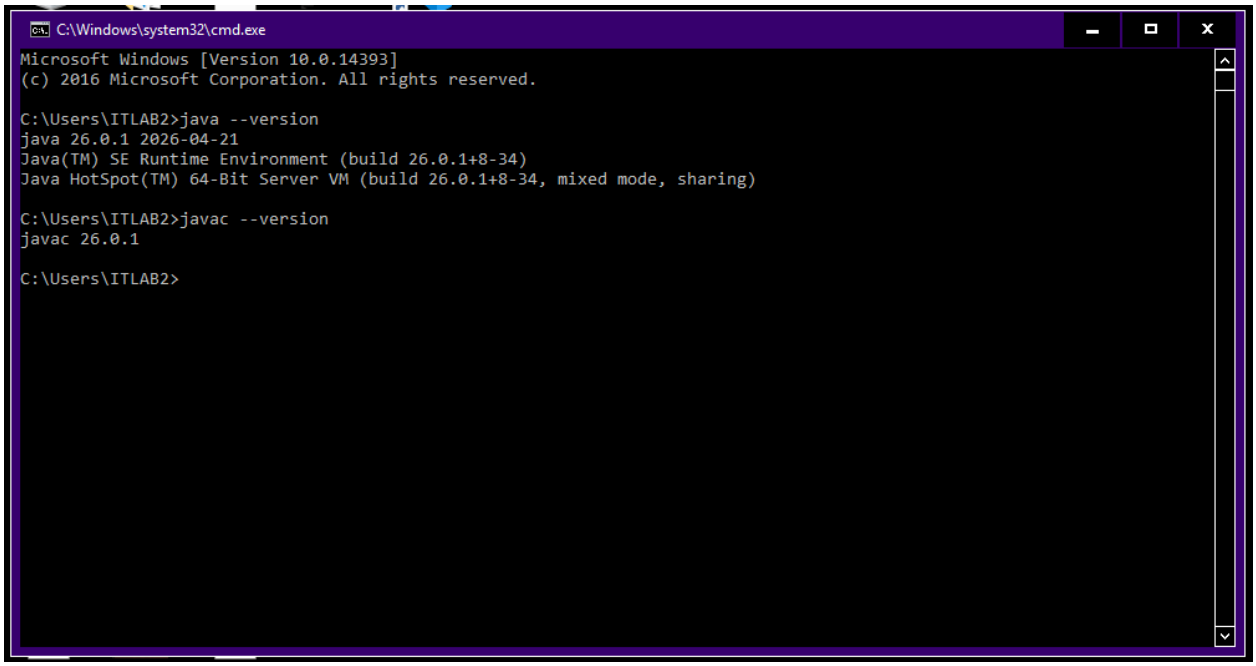

1)Go to this link https://www.oracle.com/java/technologies/downloads/?utm_source=chatgpt.com#jdk26-windows

2)Select MSI and download it

3)After that open the file, click next, skip the extra step and and click close

4)Verify the Java Version by going to command prompt and type

“Java –version” and “Javac –version” run it.

Configuring Java on Windows (Setting JAVA_HOME and PATH):

Step 1: Find Java Installation Path

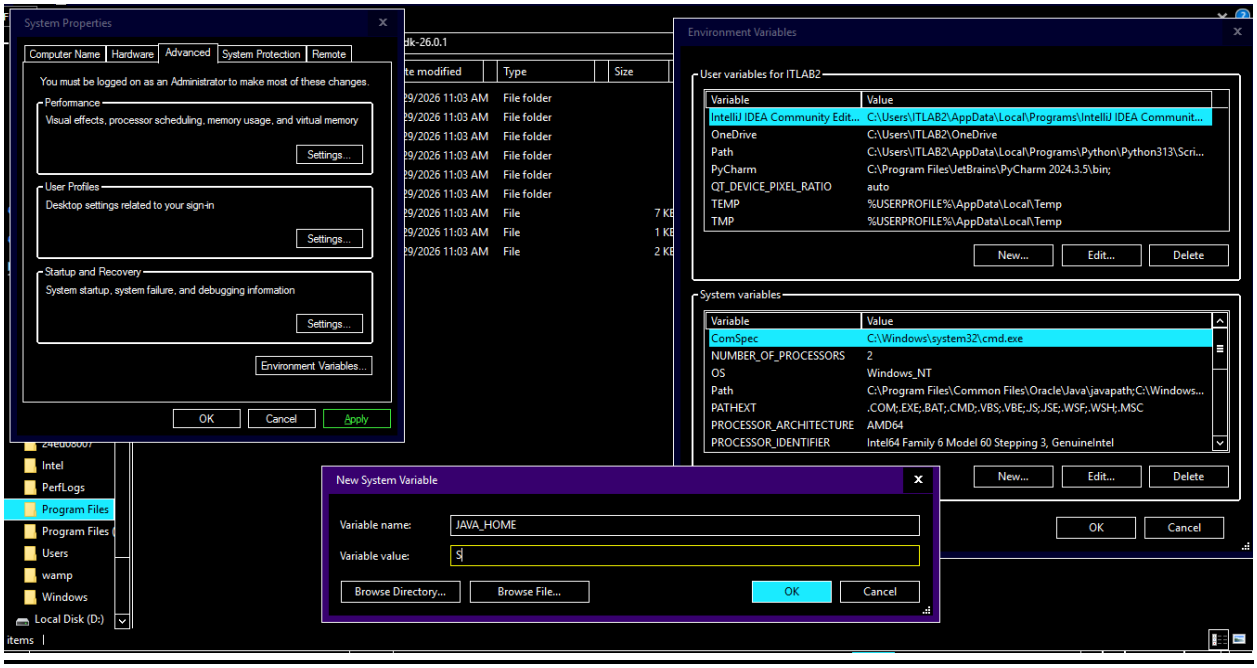

After installing Java, locate the JDK folder.

Example:

C:\Program Files\Java\jdk-25

Step 2: Set JAVA_HOME

1. Press Windows + R → Type sysdm.cpl → Press Enter.
2. Select Advanced tab.
3. Click Environment Variables.
4. Under System Variables, click New

Verify the Configuration after updating the PATH variable:

Write the command: “echo %JAVA_HOME%”
