

JAVA PROGRAMMING SIDDHARTHA ACADEMY OF HIGHER EDUCATION (DEEMED TO BE
LAB (23AI5351) UNIVERSITY) • DEPARTMENT OF AI • BATCH 2025–2029

Week 05: Packages, Access Specifiers & Interfaces

Student: Trivikram Roll No: 25EU02067 • Lab Record Verified

1. OBJECTIVE / AIM

To create and import user-defined packages, demonstrate access specifiers, and implement multiple inheritance using Java interfaces.

2. CONCEPT & THEORY

Packages group related classes and interfaces into a single namespace. Interfaces declare abstract method contracts that allow multiple inheritance and loose coupling across components.

3. JAVA SOURCE IMPLEMENTATION

```
// Java Programming Lab - Experiment 05
// Student: Trivikram | Roll No: 25EU02067
interface Printable {
    void print();
}

interface Showable {
    void show();
}

class LabReport implements Printable, Showable {
    private String title;

    public LabReport(String title) {
        this.title = title;
    }

    @Override
    public void print() {
        System.out.println("Output Generated: " + title);
    }

    @Override
    public void show() {
        System.out.println("Displaying UI Report for: " + title);
    }
}
```

```
}  
  
public class Week5Demo {  
    public static void main(String[] args) {  
        LabReport report = new LabReport("Java Programming Lab Week 5 Manual");  
        report.print();  
        report.show();  
    }  
}
```

4. COMPILATION & EXECUTION OUTPUT

```
Output Generated: Java Programming Lab Week 5 Manual  
Displaying UI Report for: Java Programming Lab Week 5 Manual
```
